Mr. Mark Greenberg  
Division of Human Factors Safety  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Crystal River Unit 3  
Docket No. 50-302  
Operating License No. DPR-72  
NUREG 0801, "Evaluation Criteria for Detailed  
Control Room Design Review"  
Request for Extension of Comment Period

Dear Mr. Greenberg:

Notification of the availability of NUREG 0801, "Evaluation Criteria for Detailed Control Room Design Review" appeared in the November 11, 1981 Federal Register. The comment period assigned to this document expires December 28, 1981. Florida Power Corporation does not believe that a meaningful review of these criteria can be performed within the time provided. Extension of the comment period for an additional sixty days would provide the utility industry with adequate time to supply critical insight and will not unreasonably delay control room design review.

Therefore, Florida Power Corporation requests that the comment period assigned to NUREG 0801 be extended an additional sixty (60) days until February 26, 1982.

Sincerely,

*David G. Mardis*

David G. Mardis
