BEFORE THE
UNITED STATES NUCLEAR REGULATORY COMMISSION

In the Matter of :
PHILADELPHIA ELECTRIC COMPANY : Docket Nos. 50-277
50-278

APPLICATION FOR AMENDMENT
OF
FACILITY OPERATING LICENSES
DPR-44 & DPR-56

Philadelphia Electric Company, Licensee under Facility
Operating Licenses DPR-44 and DPR-56 for Peach Bottom Atomic
Power Station Unit Nos. 2 and 3 respectively, hereby requests
that the Technical Specifications incorporated in Appendix A of
the Operating Licenses be amended by adding certain sections as
indicated by a vertical bar in the margin of attached pages 36
and 36a.

The proposed specifications provide operational and
surveillance requirements for the Reactor Protection System (RPS)

power supply protective trip devices described in an October 30, 1981 letter, S. L. Daltroff, Philadelphia Electric Company, to J. F. Stolz, NRC, and incorporated herein by reference. These specifications would become effective following installation of the protective trip devices. Implementation of this modification is contingent upon NRC staff approval of the proposed design identified in the referenced letter.

Pursuant to 10 CFR 170.22, "Schedule of Fees for Facility License Amendments", Philadelphia Electric Company proposes that this Application for Amendment be considered a Class III Amendment for Unit 2, and a Class I Amendment for Unit 3, since the proposed changes are deemed not to involve a significant hazards consideration.

The Plant Operation Review Committee and the Operation and Safety Review Committee have reviewed these proposed changes to the Technical Specifications, and have concluded that they do not involve an unreviewed safety question or a significant hazard consideration; and will not endanger the health and safety of the public.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "S. L. Daltroff", is written over a series of horizontal dashed lines.
