Gentlemen:

In accordance with Arkansas Nuclear One - Unit 1 Technical Specification 6.12.3.1.i, attached is the subject report concerning a trip of a lockout relay associated with the No. 1, diesel generator. This LER was initially determined to be a thirty day reportable occurrence. Further investigation revealed it to be a fourteen day reportable occurrence. The delay in the determination of the report type resulted in the late submittal of this report.
