Conserve
energy

WAR wastes
people, minds,
nations and
civilization.
For power, and
money, U.S.
will stoop to
any crime against
humanity.

United States of America
Nuclear Regulatory Commission
Office of the Secretary
Booketing + Service Branch
Washington, D.C.

In every region of the country there is some tentacle of the nuclear weapons production complex - some university or factory or laboratory or contractor feeding this monstrous system of mass destruction. I tell my colleagues in the media, who are so fond of chasing after lesser crimes and misdemeanors, that they are missing the biggest story. If we left it to the professional media to report the "news" of the nuclear arms race, we might well be waiting until the H-bombs start going off. That is why I place such high stock in the Nuclear Weapons Facilities Project, which is helping to sound the alarm - while there is still time - in every corner of the country.

from "Fellowship"
Metropolitan Edison
Co., Partial District
Decision, Vol. 1 and
Vol. 2 received.
Postage paid \$4.97,
of tax payers' money!

Do not send me any more of your propaganda.
Nuclear plants and nuclear weapons, which U.S.
has distributed to all the world, are a global hazard.
U.S. is hell-bent on continuing war which
will destroy Earth. I view with great alarm the
decadence of U.S.A + U.S. interference in all nations.
