RE: Inspection 81-01
License No. 37-12890-01

Dear Sir,

In reply to your letter of 20 Nov. 1981 regarding the findings of the NRC inspection of our facility conducted by Mr. J. Nicolosi of your staff, the following action has been taken,

1. A new survey meter (Cutie Pie) has been ordered. Expected delivery within 30 days.
2. Our CDV-715 Ion Chamber was found to be defective prior to your inspection and efforts were taken to have the unit repaired. In the event the unit cannot be repaired a second unit will be purchased to assure there will always be at least one meter available that meets our NRC License requirements.
3. We shall be in full compliance before 1 Jan. 1982.

Should the above plan of corrective action not be acceptable please advise us.

I would like to express our appreciation for the courteous and professional manner shown us by Mr. Nicolosi while conducting the inspection and reviewing his findings with us. It is a pleasure to deal with professionals of his caliber.

Sincerely,

Tom Graham
Assistant Administrator
