

January 20, 1978

Mr. Steven A. Varga, Chief  
Light Water Reactors Branch #4  
Division of Project Management  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

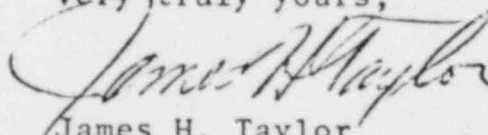

Dear Mr. Varga:

As part of the review of B&W's BSAR-205 application (Docket STN-50-561), the NRC requested "... results of the crud buildup evaluation" (Question 221.30). B&W originally committed to provide this information as a revision to B&W topical report BAW-10087. By my letter to you of November 22, 1977, we committed to providing a letter report on this subject rather than a revision to BAW-10087.

Attached, for your information, is B&W letter report "Fuel Crud Measurements and Evaluation in B&W Pressurized Water Reactors" which is our response to Question 221.30. This report is considered by B&W to be proprietary and is being provided to you in both "Proprietary" and "Non-Proprietary" versions. The proprietary information is contained in Figures 1, 2, and 3 of the "Proprietary" report; this information has been omitted from the "Non-Proprietary" report. This information was extracted from BAW-10087P-A, Rev. 2 (Reference 3 of the report) Appendix E. Appendix J of this topical report contained B&W's justification for proprietary treatment of this information; NRC concurrence with this treatment was obtained by your letter of July 22, 1977, which is also included in BAW-10087P-A, Rev. 2. Since this approval has already been obtained, we are not submitting another affidavit, but are providing the "Proprietary" and "Non-Proprietary" reports.

If you have any questions, please contact Mr. William R. Gray (Extension 2553) of my staff.

Very truly yours,

James H. Taylor  
Manager, Licensing

Mr. Denwood F. Ross  
Assistant Director for Reactor Safety  
Division of Systems Safety  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

NOV 25 1977

Dear Mr. Ross:

In reviewing the commitments made in the BSAR-205, we have decided that it is inappropriate to revise BAW-10087P-A, Rev. 2 as was committed in our response to NRC Question 221.30 (section 4.4.4). Instead, as provided in the question, we would prefer to submit the requested information as a letter report. This letter report will be submitted to you by the end of 1977.

In addition, our scheduled submittal date for BAW-10082 ("Qualification of Safety Related Control and Instrumentation Equipment") has slipped. We now intend to submit a final draft of this topical report during the first quarter of 1978.

Very truly yours,

  
James H. Taylor  
Manager, Licensing
