Gentlemen:

Subject: Report No. 50-416/81-61

This refers to the routine preoperational safeguards inspection conducted by Mr. R. Goode of this office on December 14-18, 1981, of activities authorized by NRC License No. CPPR 118 at Grand Gulf Nuclear Station and to the discussions of our findings held with Mr. K. Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your Interim Security Plan for Fuel Storage and approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspector.

Six new unresolved items and one Inspector Follow-up Item resulted from this inspection and are discussed in the enclosed report. These items will be examined during subsequent inspections.

Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

R. C. Lewis, Director
