SUPPLEMENTAL SURVEILLANCE OF 16 x 16 FUEL ASSEMBLIES

The attached memo was sent to me instead of to you and I both. It's a bit confusing; the first paragraph indicates that the first two licensees to use the System 80 design must make a "surveillance commitment" while the last paragraph asks assurance that the listed four applicants are responsible. I think I know what Vic wants but perhaps we should discuss it before we proceed.
