Dear Mr. Denton:

This is to provide additional information with regard to one of the Effluent Treatment System Branch open items not closed by reference (a).

SRP Section 11.5 requires that monitoring instrumentation specifications and performance criteria meet the recommendations embodied in ANSI N13.10-1974. Our radiation monitor vendor has verified that this standard is applicable to their design and will provide documentation to verify their conformance by March, 1982.

Please address questions regarding this matter to this office.
