Gentlemen:

We have received a copy of your application dated December 18, 1981, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application proposed certain Technical Specification changes related to steam generator inspection after steam generator replacement for Turkey Point Units 3 and 4. Fees pursuant to 10 CFR 170.22 were not remitted with your application. Although this application is in response to an ONRR letter dated July 1, 1981, it is not exempt from fees.

Based on information provided by the ONRR staff as a result of their preliminary review of your application, it has been determined that a Class III fee (\$4,000) is appropriate for Unit 3 and a Class I fee (\$400) is appropriate for Unit 2 since the review involves consideration of a single safety issue and a duplicate unit. Therefore, you should remit the sum of \$4,400 to this office. If the ONRR staff's final review of your application reveals that these fees are not correct, you will be notified and any necessary adjustment will be made.

Sincerely,

Original Signed by
Wm. O. Miller
