

TO DCS 1/5/82 DOCKET 40-2061
Return to L Tyson 396-55

DEC 18 1981

Dr. Philip F. Gustafson, Director
Illinois Department of Nuclear Safety
1035 Outer Park Drive
Springfield, Illinois 62704

DESIGNATED ORIGINAL

Certified By L. Tyson

Dear Dr. Gustafson:

We are transmitting to you the Radiological Survey of Kress Creek prepared for NRC by Oak Ridge Associated Universities. The levels of soil contamination found exceed our guidelines for the unrestricted use of land contaminated with natural thorium or uranium. We have, therefore, requested Kerr-McGee Chemical Corporation to submit to us a plan for the decontamination of Kress Creek and for the disposal or storage of the contaminated soil.

For your information, copies of our letter to Kerr-McGee, the Branch Technical Position for disposal or onsite storage of thorium and uranium contaminated wastes and the analysis upon which the position is based are attached.

Sincerely,

Original Signed by
Ralph G. Page

R.G. Page, Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety, NMSS
