Docket Nos. 50-254
 50-265

JAN 20 1982

Mr. L. DeGeorge
 Director of Nuclear Licensing
 Commonwealth Edison Company
 P.O. Box 767
 Chicago, IL 60690

Bear Mr. DeGeorge:

SUBJECT: CONTROL OF HEAVY LOADS (NUREG-0612) FOR QUAD CITIES STATION
 UNITS 1 AND 2

On December 22, 1980 we issued a letter to you requesting that you: review provisions for handling and control of heavy loads at Quad Cities Station; evaluate these provisions with respect to the guidelines in NUREG-0612; and provide certain additional information to be used for an independent determination of conformance to these guidelines. You provided your initial response to this request by letter dated June 22, 1981.

Enclosed is a draft Technical Evaluation Report (TER) prepared by our independent contractor, the Franklin Research Institute (FRC), based on your June 22, 1981 response to Section 2.1 of our December 22, 1980 letter. Certain unresolved items are identified in the report.

We are forwarding this draft TER to you for your review and comment. After you have had the opportunity to review the enclosed TER, your NRC Project Manager will contact you to arrange a conference call to discuss and resolve the open items listed in the draft report. An FRC representative will participate in the call. Subsequently, a final TER and our Safety Evaluation of this matter will be issued.

Your NRC Project Manager will contact you within 60 days regarding this subject.

Sincerely,

ORIGINAL SIGNED BY

Domenic B. Vassallo, Chief
 Operating Reactors Branch #2
 Division of Licensing
