Mr. Robert L. Tedesco
Assistant Director for Licensing
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Tedesco:

Allens Creek Nuclear Generating Station
Unit I
Docket No. 50-466
Application of Final Rule on Licensing
Requirements for Pending Construction Permit
and Manufacturing License Applications

On February 5, 1982, a letter was sent from your office to Mr. J.H. Goldberg concerning the application of the Final Rule on Licensing Requirements for Pending Construction Permit and Manufacturing License Applications on the Allens Creek Nuclear Generating Station. It was requested within this letter that Houston Lighting & Power Company (HL&P) advise your office if the HL&P review of the subject Final Rule resulted in identification of a need for any clarifying changes in the Allens Creek application.

In response to the requested information, we have compared commitments made in the Allens Creek Preliminary Safety Analysis Report and construction permit conditions recommended by the Staff in the Safety Evaluation Report, Supplements 3 and 4, with portions of the Final Rule that have been changed from the proposed requirements of NUREG-0718. Our review of the Final Rule did not identify the need for clarifying changes to the Allens Creek application. Therefore, we have concluded and concur with conclusions reached in your letter that our commitments and plans, together with the Staff's recommended construction permit conditions are in accordance with the requirements of the Final Rule.

Very truly yours,

J.H. Goldberg
Vice-President
Nuclear Engineering and Construction
