ATTN: Mr. Sol Burstein
Executive Vice President

This refers to the routine safety inspection conducted by Messrs. W. G. Guldemon and R. L. Hague of this office on December 1-31, 1981, of activities at Point Beach Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-24 and No. DPR-27 and to the discussion of our findings with Mr. G. A. Reed at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as described in the enclosed Appendix. The inspection showed that action had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this noncompliance is required and we have no further questions regarding this matter at this time.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
