Mr. John T. Collins, Administrator
U. S. Nuclear Regulatory Commission
Region IV
611 Ryan Plaza Dr., Suite 1000
Arlington, TX 70612

SUBJECT: Fort St. Vrain Unit No. 1
Emergency Appraisal Audit

Dear Mr. Collins:

In response to the Emergency Appraisal Audit Team concerns about the Shift Supervisor's responsibilities as Emergency Director, we have revised and issued Operations Order, OP-80-18, a copy of which is attached.

We are also in the process of revising our emergency plans and procedures to reflect this responsibility and authority. Until these revisions can be completed and issued the operations order should adequately meet the requirements. Each Shift Supervisor has been issued the operations order and has received instructions concerning its meaning and intent.

Very truly yours,

Don W. Warembourg
Manager, Nuclear Production
Fort St. Vrain Nuclear
Generating Station

ATTACHMENT II

PRODUCTION DEPARTMENT POLICY

Shift Supervisor's Duties
Fort St. Vrain Station

The prime responsibility of the Shift Supervisor on duty at the Fort St. Vrain Station is to manage the operation of the plant in such a manner that it is always in a safe operating condition.

He has the authority to maintain a safe operating condition, without regard to system demand or requests from load dispatcher (or others) for generation.

This responsibility, and corresponding authority, takes precedence over those duties outlined in the job description for Shift Supervisors, and must be always the first consideration when determining operating conditions.

Under radiological emergency conditions, the Shift Supervisor is assigned the duties of Emergency Director. In this position, the Shift Supervisor shall report to the control room and remain in the control room until properly relieved by another qualified SRO. Except for unusual circumstances beyond normal administrative control the Shift Supervisor may be relieved only by another Shift Supervisor or by the Superintendent of Operations.

In the position of Emergency Director, the Shift Supervisor assumes the duties of the Emergency Director as specified in the Station Emergency Plan. The primary duty of the Shift Supervisor under emergency conditions is overall plant operation and emergency coordination. The Shift Supervisor shall not become involved in individual operational problems or activities at the expense of overall plant operations.

In the position of Emergency Director it is normally expected that the Shift Supervisor will be in communication with plant management. In the event, however, that communication with plant management is not possible, the Shift Supervisor is the Emergency Director and has full responsibility and authority to implement all actions of the emergency plans and procedures and to implement those actions necessary to protect the health and safety of the public.

O. R. Lee
