

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FEB 22 1982

MEMORANDUM FOR: Victor Stello, Jr., Chairman
Committee to Review Generic Requirements

FROM: C. J. Heltemes, Jr., Member
Committee to Review Generic Requirements

SUBJECT: MINUTES OF CRGR MEETING NUMBER 7

The draft minutes of the CRGR meeting Number 7 dated February 18, 1982 reflect the general discussion and conclusions associated with the proposed rule on documenting SRP differences under the proposed implementation schedule. However, the draft minutes do not reflect the discussions regarding the possible application of the proposed rule to only future plants whose FSAR is in the early stage of development. As noted in my previous oral and written comments, I favor further analysis to determine whether the proposed rule would be justified if applied to only future plants in light of the greatly reduced resource commitment that would result if the SRP differences were documented as an integral part of the FSAR development.

C. J. Heltemes, Jr., Member
Committee to Review Generic Requirements
