Arlington, Texas 76011

KMLNRC 82-167  
Re: NRC Docket No. STN 50-482  
Ref: Interim Report dated November 19, 1981, transmitted by  
GLKoester letter (KMLNRC 81-137) to GLMadsen, NRC  
Subj: Interim Potential 10CFR50.55(e) Report on Nuclear Coatings  
in the Reactor Building

Dear Mr. Madsen:

This letter provides an update on the evaluations of the nuclear coatings applied in the Reactor Building of the Wolf Creek Generating Station, Unit No. 1.

A Purchase Order has been issued for testing of the coatings by a third party Test Consultant. Testing could begin within four to six weeks pending the following:

- 1) Architect/Engineer complete and issue a test program which has been reviewed by KG&E and the independent Test Consultant.
- 2) Test Consultant complete and issue test procedures after review and approval by the Architect/Engineer.

The test results on status of the tests will be submitted to you on or before April 23, 1982.

Yours very truly,

*Glenn L. Koester*
