Gentlemen:

This refers to your letter to J. G. Keppler dated February 18, 1982, describing management actions which you have initiated regarding implementation of the Quality Assurance Program at the Perry Nuclear Site.

As you know, we have been conducting investigation and inspection activities in the electrical area at the Perry Nuclear site for several months. As part of this effort, we met in our office on February 10, 1982, to discuss some of our interim findings and your planned activities.

Upon completion of the ongoing investigative activities, we plan to meet with you to summarize our findings, and to discuss the results of the evaluations described in your February 18, 1982 letter. We will contact you later to arrange such a meeting.

Your cooperation with us is appreciated.

Sincerely,

Original signed by C.E. Norelius
