

Attachment G - Channel and Toe Apron Calculations

Attachment G was added to the Reclamation Plan

Additional design details and calculations are provided for the drainage channel designs and modification to the riprap placement along the toe of the out slopes. This Attachment provides copies of the additional calculations.

Attachment H - Rock Test Results

Attachment H was added to the Reclamation Plan

An off site borrow source was located to provide riprap material for the final rock amour and erosion protection materials. This Attachment presents the location description and test results on the material.
