

APR 7 1990

Docket No. 50-254
Docket No. 50-265

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Senior Vice President
Post Office Box 767
Chicago, IL 60690

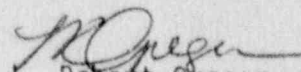

Gentlemen:

In March 1990 we received Revision 7D of the Quad Cities Station Annex to the Generating Stations Emergency Plan. We have reviewed this revision, which is dated December 1989, and have concluded that it is acceptable and does not decrease the effectiveness of the emergency plan for the Quad Cities Station.

Revision 7D included summary descriptions of the Station's upgraded seismic monitoring equipment and the upgraded provisions for an offsite reassembly area for nonessential personnel who would be evacuated from the site if certain criteria were satisfied. The revision also included several changes to position titles and the names of several offsite support organizations.

If you have any questions, your staff should contact Mr. T. Ploski of my staff at (708) 790-5529.

Sincerely,

L. Robert Greger, Chief
