SUBJECT: AMENDMENT NOS. 12 AND 17 TO RADIOACTIVE MATERIALS LICENSES FOR
JUBILANT DRAXIMAGE RADIOPHARMACIES, INC. D/B/A JUBLIANT
RADIOPHARMA, NRC LICENSE NOS. 09-32781-04MD AND 09-32781-02MD,
RESPECTIVELY

Dear Mr. Kinne:

Enclosed are Amendment Nos. 12 and 17, respectively to your U.S. Nuclear Regulatory Commission (NRC) Material License Nos. 09-32781-04MD and 09-32781-02MD in accordance with your November 15, 2019 and November 25, 2019 requests to remove the 712 Westport Rd. location of use and to add an updated facility diagram for an existing location of use. Your letters are available electronically from the NRC Agencywide Documents Access and Management System (ADAMS) at Accession Nos. ML19322C103 and ML19330F468, respectively.

Please review the enclosed documents carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Environmental assessments for these actions are not required, since they are categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(c).

The NRC staff has reviewed your final status surveys for your 712 Westport Rd. location of use. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from the 712 Westport Rd., Kansas City, MO location of use, listed on NRC License No. 09-32781-04MD, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material, for the 712 Westport Rd. location of use. The referenced facility is suitable for unrestricted use. Your NRC Materials License No. 09-32781-04MD has been amended accordingly.

The enclosures to this letter contain sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

C. Kinne

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC's Generic Communications Web page under "Regulatory Issue Summaries" at <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/> and the link for frequently asked questions regarding protection of security-related sensitive information may be located at <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.
