Executive Director  
N.E. 13th Street at Lincoln Blvd.  
Oklahoma City, Oklahoma 73104

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Selvan Rajendran of this office on March 8, 1990, of the activities authorized by NRC Byproduct Material License 35-12091-02, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

From the inspector's review of the records, it was apparent that the overall radiation safety program seemed to be adequate and well organized.

No violations or deviations were identified.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
