Docket Nos. 50-277
50-278

Philadelphia Electric Company
ATTN: Mr. D. M. Smith
Executive Vice President-Nuclear
Correspondence Control Desk
P. O. Box 7520
Philadelphia, Pennsylvania 19101

Gentlemen:

Subject: Combined Inspection Report Nos. 50-277/90-09 and 50-278/90-09

This refers to the routine safety inspection conducted by Mr. J. J. Kottan of this office on April 2-6, 1990 of activities authorized by NRC License Nos. DPR-44 and DPR-56 at the Peach Bottom Atomic Power Station, Units 2 and 3 and to the discussions of our findings held by Mr. J. Kottan with Mr. D. LeQuia and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was also brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent inspection report.

Within the scope of this inspection, no violations were observed.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
Ronald R. Bellamy

Ronald R. Bellamy, Chief
Facilities Radiological Safety
and Safeguards Branch
Division of Radiation Safety
and Safeguards
