Subject: Limerick Generating Station, Unit 1
Technical Specifications Change Request

Gentlemen:

Philadelphia Electric Company (PECo) hereby submits Technical Specifications Change Request No. 90-11-1, in accordance with 10 CFR 50.90, requesting an amendment to the Technical Specifications (TS) (Appendix A) of Operating License No. NPF-39. Information supporting this change request is contained in Attachment 1 to this letter, and the proposed replacement page is contained in Attachment 2.

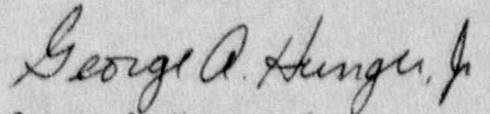

This submittal requests a change to the TS Surveillance Requirement 4.7.4b to allow a one-time extension of the snubber visual inspection period. The current inspection period plus the 25% grace period expires on July 14, 1990. Accordingly, this proposed change is needed to avoid a shutdown of Unit 1 in order to perform a TS required reduced interval visual inspection of three snubbers located in the drywell. The change request proposes to extend the inspection interval to the end of the upcoming refueling outage, currently scheduled to begin in September, 1990.
