(LIC-89-0136)

Gentlemen:

SUBJECT: Walkdown to Verify Fire Barrier Penetration Drawings and
Surveillance Tests

In Reference 2, Omaha Public Power District (OPPD) committed to perform a walkdown of safety-related portions of Fort Calhoun Station to verify the accuracy of fire barrier penetration drawings and surveillance tests. OPPD indicated that completion of these walkdowns was anticipated by the end of the 1990 refueling outage.

The scope of work associated with the walkdowns has increased from earlier projections due to the integration of related tasks, including actions in response to NRC Information Notice 88-04, into the project. As a result, OPPD currently plans to complete the walkdowns and subsequent drawing and procedure development and implementation by August 31, 1990.

If you should have any questions, please contact me.

Sincerely,

W. G. Gates
