Subject: License Amendment Request to Extend the Operating License (OL) Term
to 40 Years From The Date of OL Issuance (TAC Number M75849)

Gentlemen:

Enclosed is an application for an amendment to the Davis-Besse Nuclear Power Station, Unit 1 (DBNPS), Operating License Number NPF-3. This application requests that the Operating License expiration date of Section 2.H be extended from March 24, 2011, to April 22, 2017, 40 years from the date of OL issuance. The current OL term is 40 years commencing with issuance of the construction permit (CP) on March 24, 1971. The proposed amendment would allow plant operation to continue approximately six years beyond the current OL expiration date.

The proposed amendment is in accordance with Section 103.c of The Atomic Energy Act of 1954 which provides that a license is to be issued for a specified period not exceeding 40 years, and 10CFR50.51 which provides that each license will be issued for a fixed period, to be specified in the license, not to exceed 40 years from the date of issuance. Toledo Edison requests that this amendment be issued by the Nuclear Regulatory Commission by December 31, 1990 with implementation within 45-days following issuance.

If you have any questions regarding this amendment request, please contact Mr. R. W. Schrauder, Manager - Nuclear Licensing, at (419) 249-2366.

Very truly yours,

PWS/ssg
