Response to Notice of Violation (VIO 50-277/90-08-04 and 50-278/90-08-08)

Restatement of Violation

The Peach Bottom Atomic Power Station Guard Training and Qualification Plan, dated June, 1986, Section 1.2.1. (1) states, in part, that glaucoma shall be disqualifying, unless controlled by acceptable medical or surgical means.

Contrary to the above, on March 29, 1990, the inspectors determined that security personnel were not being tested for glaucoma.

Corrective Steps Taken and Results Achieved

A glaucoma testing program has been initiated for security personnel. The testing program requires that security personnel, who currently require corrective lenses, be tested first. Based upon a medical evaluation, security personnel determined to be susceptible to glaucoma, will be tested next. All remaining security personnel will be tested as part of their annual physical examination. To date, eighteen (18) security personnel have been tested.

Corrective Steps Which Will Be Taken to Avoid Further Violations

Actions have been initiated to obtain the necessary equipment to perform glaucoma testing on site. Subsequent glaucoma testing will be performed as part of the annual physical examination for all security personnel.

Date When Full Compliance Will Be Achieved

Full compliance will be achieved on or before June 1, 1991.
