Subject: Withdrawal of License Amendment Applications to Revise Technical Specification 3/4.6.3.1, Containment Isolation Valves (TAC Numbers 66008 and 73244)

Gentlemen:

Toledo Edison submitted an Operating License Amendment Request (Serial Number 1737, dated 12/22/89) to remove Technical Specifications (TS) Table 3.6-2, Containment Isolation Valves, from the TS and relocate the list of containment isolation valves and associated information to the Updated Safety Analysis Report (USAR). The request was approved and issued by the Nuclear Regulatory Commission as Amendment Number 147 to Facility Operating License Number NPF-3 (TAC Number 75235, Toledo Edison Log Number 3207, dated 04/13/90).

Comparing the TS revisions provided by Amendment Number 147 and outstanding Davis-Besse Operating License amendment change requests, Toledo Edison has determined that two pending amendment requests are no longer required. Based on this review, Toledo Edison withdraws the Davis-Besse Operating License Amendment Requests submitted under:
