

DIAGNOSTIC SERVICES INC.

May 11, 1990

Mr. George M. McCann, Acting Chief
Nuclear Materials Safety Section One
U.S. Nuclear Regulatory Commission
Region 3
799 Roosevelt Road
Glen Ellyn, IL 60137

REF. NO.: License #48-20341-01

Dear Mr. McCann:

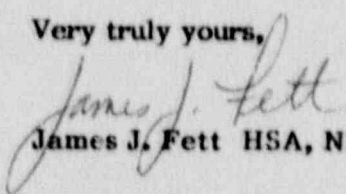

We are in receipt of your letter dated April 17, 1990, and submit the following information per your request.

Be advised that physical inventories had been conducted previous to the March 21, 1990 date. There are a number of inventory records which are apparently missing at this time. We have implemented, as of this date, a new sealed source inventory form. The inventories will be conducted quarterly as required, the information recorded, and will be made available for review by your agency for the future.

Be advised that we are currently following the procedures contained in the Appendix F, U.S. Nuclear Regulatory Commission Licensing Guide for the Medical Programs, Revision 1, October 1980. This procedure is for safely opening packages in which license material is received. A copy was available at our facility on the date that your inspector, Mr. King, was here, but was unable to be located. The procedure has been posted in the Hot Lab area for easier reference.

Thank you for your cooperation in this matter. Should you have any questions, please feel free to contact us at your convenience.

Very truly yours,

James J. Fett HSA, NHA
