Hamilton, Montana 59840

Gentlemen:

This refers to the routine, unannounced, radiation safety inspection conducted by Mr. Anthony D. Gaines of this office on June 27, 1990, of the activities authorized by NRC Byproduct Material License No. 25-01203-01, and to the discussion of our findings held by the inspector with you at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

From our inspection it appears that your radiation safety program adequately addresses the needs of your users while still maintaining controls to protect the health and safety of your employees and the general public.

No violations or deviations were identified.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
