Crystal River Unit 3
Docket No. 50-302

March 5, 1993
3F0393-07

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: Mid-cycle 9 Outage Start Date

References: 1. NRC to FPC letter, 3N0792-13, dated July 23, 1992
2. NRC to FPC letter, 3N0792-14, dated July 23, 1992

Dear Sir:

The Commission issued Technical Specification Amendments No. 145, "Containment Emergency Sump Spray pH Control," and No. 146, "Borated Water Storage Tank Boron Concentration," effective as of the start of the Cycle 9 mid-cycle outage. Florida Power Corporation was requested to provide written notification of the start date of this outage. The mid-cycle 9 outage began on March 4, 1993. Both amendments will be implemented prior to startup from the outage.

Sincerely,

Shirley Boldt for

P. M. Beard, Jr.
Senior Vice President
Nuclear Operations
