Edwin I. Hatch Nuclear Plant - Unit 1  
Generic Letter 89-16  
Completion of Hardened Vent Installation

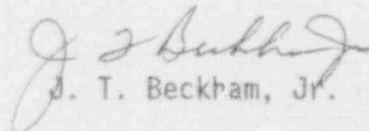

Gentlemen:

On October 24, 1989, Georgia Power Company (GPC) responded to Generic Letter 89-16, "Installation of a Hardened Wetwell Vent." The generic letter informed owners of BWR plants with Mark I containments of the NRC program for disposition of issues related to the Mark I Containment Performance Improvement Program and encouraged licensees to voluntarily install a hardened vent under 10 CFR 50.59. In our response, GPC committed to install a hardened vent on Unit 1 before startup from the end of cycle 14 refueling outage.

This letter provides notification of completion of the hardened vent installation on Plant Hatch Unit 1. As specified in our response letter, this installation was completed during the recent end of cycle 14 refueling outage. This completes all action in response to Generic Letter 89-16 for Plant Hatch Unit 1.

If you have any questions in this regard, please contact this office.

Sincerely,

  
J. T. Beckham, Jr.
