Dear Mr. Smith:

Subject: Combined Inspection Nos. 50-352/93-10 and 50-353/93-10

This letter refers to the physical security program inspection conducted by Messrs. A. Della Ratta and G. C. Smith of this office on April 26-30, 1993, at Limerick Generating Station, Units 1 and 2, of activities authorized by NRC License Nos. NPF-39 and NPF-85 and to the discussions of our findings held with Mr. D. Helwig and other members of your staff by Mr. Della Ratta at the conclusion of the inspection.

Areas examined during the inspection are important to public health and safety and are described in the NRC Region I inspection report which is enclosed with this letter. The inspection consisted of selective examinations of security procedures and representative records, interviews with personnel and observations by the inspectors.

We found that your physical security program is effective and directed toward assuring public health and safety. Based on several program enhancements made since the last inspection, management support for the program was evident. No safety concerns or violations of regulatory requirements were identified, therefore, no response to this letter is required.
