SUBJECT: NRC INSPECTION REPORT 50-482/93-13 (NOTICE OF VIOLATION)

This letter refers to the inspection conducted by Mr. T. W. Dexter of this office for the period of May 3-7, 1993. The inspection included a review of activities authorized for your Wolf Creek Generating Station. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

Based on the results of this inspection, one of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). We are concerned about this violation because it involved your security equipment testing procedure which resulted in a condition that did not meet requirements in the Physical Security Plan. Your staff promptly implemented effective corrective actions to address the problem. Based on your corrective actions, no response to this violation is required.

The material enclosed contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.
