Dear Ms. Wright:

REF: XSNM02747

On April 29, 1993, Edlow International Company submitted an application (XSNM02747) requesting authorization to export low enriched uranium hexafluoride to EURATOM. The EURATOM Supply Agency has advised us that they will not provide assurances to support this application.

As we have an urgent shipment pending, we have chosen to reduce the scope of the application request. The application should be amended to reflect a total quantity of 12,654 Kg U enriched to 3.5 percent with 443 Kg U235. This material will be exported to:

British Nuclear Fuels plc
Springfields Works
Salwick, Preston
PR4 0XJ, United Kingdom

The material will be used for storage and possible working stock at British Nuclear Fuels.

We appreciate your continuing assistance in this matter; please do not hesitate to contact me should you require additional information in support of this request.

Best regards,

Melissa Colvin
