Dear Dr. Murley,

On June 26/27, 1990 a meeting with ACRS-RSK (Atomic Committee on Reactor Safeguards (ACRS) and German Reactor Safety Commission (RSK)) took place in Obrigheim.

Among others the subject **EXECUTION OF REPEATED PRESSURE TESTS** of the Reactor Pressure Vessel of Light Water Reactors was dealt with. For reasons of preperation of a definite statement I would suggest to organize a workshop. Participants should be representatives from United States Regulatory Commission (NRC), French Atomic Energy Commission (CEA), Japanese Nuclear Safety Commission (NSC) and Staatliche Materialprüfungsanstalt (MPA). The workshop could be held in Europe as well as in the USA in spring of next year.

If no other proposal is put forward, I would be glad to host the workshop at MPA Stuttgart.

Yours sincerely,

9306030264 911215
