Subject: Personnel Changes at the Manhattan College Zero Power Reactor (MCZPR)

Dear Ted:

Confirming our recent conversation, I will be resigning as Reactor Administrator and Radiation Safety Officer at the MCZPR effective June 15, 1993. After 10 years in the position, I feel it is time for this change to occur.

Dr. William Duggan, who is currently Chief Reactor Supervisor and a licensed SRO at the MCZPR will become Reactor Administrator and Radiation Safety Officer. Dr. Duggan's qualifications for this position are excellent. He has a doctorate in nuclear engineering and, as Chief Reactor Supervisor for the last 3 years, is completely familiar with the Reactor. He has taught undergraduate and graduate nuclear engineering and health physics courses. Bill also brings significant relevant nuclear administrative and consulting experience to the position. He can be reached at 718-920-1112.

Mrs. Catherine Stanton, who currently teaches both undergraduate and graduate health physics and graduate nuclear courses in our engineering program, will assume the position of Chief Reactor Supervisor. Mrs. Stanton has a masters degree in nuclear engineering, is familiar with the MCZPR, and has extensive industrial and consulting experience in nuclear reactor technology, waste management, and associated fields. She is an officer of the local chapter of the American Nuclear Society.

I have enjoyed working with you and know that you will find both continuity and a cooperative working relationship with the new Administration of the MCZPR.

Sincerely,

Robert E. Berlin
Reactor Administrator
