Subject: Response To Routine Inspection No: 93-001  
Docket No: 030-31662  
License No: 44-28509-01

Dear Mr. Ladun;

In response to the above referenced inspection violation findings, please accept our response.

A. Violation: 10 CFR 34.26 requires that a quarterly inventory be conducted to account of all sealed sources.

Response: Vermont NDT Inc. only has one (1) source and based on this fact and the Camera Log records all times the source is removed from it's storage location, we thought this would be sufficient. From this point on, a quarterly inventory Log shall be set up. Personnel have been informed about this requirement and have complied.

B. Violation: 10 CFR 20.203(b) requires that each radiation area be conspicuously posted with a radiation caution symbol and the words "Caution Radiation Area".

Response: As of April 28, 1993 all three (3) corners of the building which surround the shooting room on the outside of the building are now posted with "Caution Radiation Area" signs.

Respectfully Submitted,

Richard J. Bennardo  
Radiation Safety Officer  
Vermont NDT Inc.
