ATTN: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

In the Matter of ) Docket Nos. 50-327  
Tennessee Valley Authority ) 50-328

SEQUOYAH NUCLEAR PLANT (SQN) - UPDATED INFORMATION TO TECHNICAL  
SPECIFICATION (TS) CHANGE 93-01, "REVISION OF RADIOACTIVE EFFLUENT  
RELEASE REPORT FREQUENCY"

Reference: TVA letter to NRC dated March 1, 1993, "Technical  
Specification (TS) 93-01, 'Revision of Radioactive Effluent  
Release Report Frequency'"

The above reference requested a revision to the TSs in regard to the  
frequency for submitting the effluent release report in accordance with  
10 CFR 50.36a(a)(2). Subsequent conversations with NRC have clarified  
the NRC requirements. Specifically, the effluent release report content  
is to be based on calendar activities while the submittal of the report  
is to occur before a specific milestone, consistent with other reports  
required by the TSs.

It is our understanding that this clarification is to be provided in a  
pending generic letter that will suggest a milestone date of May 1 for  
submittal of the report.

Accordingly, TVA is providing a revised requested change to TS  
Section 6.9.1.8 for Units 1 and 2. These revised pages are provided in  
the attached enclosure and replace those previously provided in the above  
reference with regard to TS Section 6.9.1.8 only. The no significant  
hazard evaluation provided in Enclosure 3 of the above reference is not  
affected by this proposed revision. The reason and justification for  
this revision are as described above.
