Re: License No. 34-7225-5(163)

Gentlemen:

We have two U.S.R.C. Isolite source containing a total of 12 mc of Strontium-90. I would like to have these calibrated for light output (I.C.I. Footlamberts) at a local, Cleveland, laboratory.

They have a Radiological safety Officer and he has been informed of my intention.

I propose to personally carry over these sources and be responsible for them during the light measurements.

Please let me know if this meets with your approval and/or if there are some other steps which need to be taken.

Sincerely yours,

PICKER X-RAY CORPORATION
