Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 45-18209-01/93-01

Thank you for your response of May 24, 1993, to our Notice of Violation, issued on April 27, 1993, concerning activities conducted under NRC License No. 45-18209-01. We have evaluated your response and found that it meets the requirements of 10 CFR 2.201. We will examine the implementation of your corrective actions during future inspections.

We appreciate your cooperation in this matter.

Sincerely,

Subject: Reply to a Notice of Violation
Triad Engineering, Winchester, VA
Docket No. 030-14659
License No. 45-18209-01

Gentlemen:

In accordance with provisions of 10 CFR 2.201, Triad Engineering has prepared this written statement regarding the subject Notice of Violation. The required response items contained herein are numbered in accordance with those listed in the formal Notice received by this office.

A. Violation of 10 CFR 30.34(c)

- (1) Triad Engineering admits the violation. It was believed that the license permitted such temporary storage since the field testing projects often required extended work hours, and the equipment was in constant control by the employee.
- (2) All employees have been instructed to return the gauges to the approved storage room at the end of each work day. All gauges are presently stored overnight in the approved storage room.
- (3) Monitoring of the gauge storage room for compliance with the corrective measures outlined above is now being conducted on a random basis. Since there is a sign out sheet and there is a known number of gauges, determination of a violation can be achieved relatively quickly. Violations of the corrective measures will be dealt with by disciplinary action as outlined in the personnel policy manual and associated supplements.
- (4) Full compliance is in effect at this time.

B. Violation of 10 CFR 71.5(a)

- (1) Triad Engineering admits the violation. It was believed that we were providing all required information regarding the material shipments. Furthermore, it was assumed that the shipping company would be knowledgeable of the regulations concerning shipment of nuclear gauges. If additional information was required, it was assumed that the shipping company would request this information.
- (2) Complete shipping papers as required by the regulations are now being included with each gauge which is transported by the carrier.
- (3) In order to avoid future violations, personnel responsible for shipment of nuclear gauges have been informed of the need for shipping papers to be provided to the carrier.
- (4) Full compliance is in effect at this time.

If you have any questions regarding this response or you require any clarifications or additional information, please do not hesitate to contact us.

Sincerely,

TRIAD ENGINEERING, INC.
