Director Nuclear Material Safety and  
Safeguards  
ATTN: Mr. Robert Burnett  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Burnett:

Enclosed are 2 (two) copies of a revised physical security plan for The University of Texas R-92 and SNM-180 licenses. The enclosed plan represents an improved and extended security capability from the currently effective plan. Except for the approval of potential use of a building at Balcones Research Center as a controlled access area on an occasional basis, the plan represents an improved version from the currently effective plan. All provisions of the plan are currently in effect except utilization of BRC.

Your review and approval of the enclosed plan is appreciated.

Sincerely yours,

*T. L. Bauer*
