NUCLEAR REGULATORY COMMISSION

Before the Atomic Safety and Licensing Board

emp

Wisconsin Electric Power Company
POINT BEACH NUCLEAR PLANT UNITS 1 & 2
DOCKET NOS. 50-266 AND 50-301
Operating License Amendment
(Steam Generator Tube Sleeving Program)

DECADE'S SECOND SUPPLEMENTAL ANSWER TO THE LICENSEE'S AND
STAFF'S FIRST INTERROGATORIES RELATIVE TO FULL SCALE SLEEVING

Wisconsin's Environmental Decade, Inc. ("Decade") makes this second supplemental answer to the Staff's first interrogatories relative to full-scale sleeving.

Staff's First Interrogatories

The Decade has recently received copies of various documents from the Applicant in response to the Decades' discovery requests under cover of Applicant's letters dated March 23 and 24, 1982.

The copies of these documents are presently located at the Decade's Madison offices and are available for your inspection, subject to your having prior written authorization from Westinghouse Electric Corporation to review those documents for which a claim of confidentiality has been asserted.

Staff's and Licensee's First Interrogatories

The Decade has also accumulated a large number of newspaper and magazine articles, as well as Staff memoranda, relating to the January 26, 1982 steam generator tube rupture at the Ginna Nuclear Plant. None of this material is indexed.

The copies of these documents are also presently located in the Decade's Madison offices and are available for your inspection.

DATED at Madison, Wisconsin, this 27th day of March, 1982.

WISCONSIN'S ENVIRONMENTAL DECADE, INC.
