Inspection Summary

Areas Inspected: Included review of previous enforcement findings; security plan and implementing procedures; security organization-management; security organization-personnel; access control-personnel; access control-packages; access control-vehicles; detection aids-protected area; alarm stations; and follow-up on security allegations.

The inspection involved 32 inspector hours on site by one NRC inspector. Eight inspection hours were accomplished during offshift periods.

Results: The licensee was found to be in compliance with NRC requirements within the ten areas examined during the inspection except for the following item:

1. Access Control (personnel) - Failure to ensure that all personnel are adequately searched as required in the physical security plan and implementing procedures.
