Gentlemen:

Georgia Power Company reported a potential deficiency to the NRC on November 18, 1981 concerning some defective cable tray splice bolts. In our letter of December 10, 1981, Georgia Power Company anticipated being able to furnish a final report on or before March 31, 1982.

This letter is to advise the NRC that Georgia Power Company has been unable to finish the evaluation on the original planned schedule and that it is now expected that a final report will be furnished by April 30, 1982.

This response contains no proprietary information and may be placed in the NRC public document room upon receipt.

Yours truly,

D. O. Foster
Project General Manager
