Director of Licensing
Attention: Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch No. 2
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Vassallo:

In the Matter of the) Docket Nos. 50-259
Tennessee Valley Authority) 50-260
50-296

Your letter dated February 5, 1982 regarding Evaluation of the Design of Emergency Response Facilities for the Browns Ferry Nuclear Plant stated that "... emergency response facilities must be completed prior to the date by which operating reactors must complete these facilities." TVA's schedule for implementation of these facilities has been previously transmitted to NRC by my letter to H. R. Denton dated June 2, 1981. It is our understanding that the requirements for these facilities are currently under review by NRC. Therefore, we will provide additional information regarding the detailed design for these facilities when NRC has issued final guidance and requirements for emergency response facilities.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
L. M. Mills, Manager

Nuclear Regulation and Safety

Subscribed and sworn to before
me this 6th day of April 1982.
