Mr. J. B. Baird
U.S. Nuclear Regulatory Commission
Region IV
611 Ryan Plaza Drive
Office of Inspection & Enforcement
Arlington, Texas 76012

Dear Mr. Baird:

We recently had a small contamination problem on the upper research level adjacent to the pool. It went unnoticed and a tour was allowed to enter. Although this was not a reportable incident I am sending a copy of the report for your files. Everything worked out well and except for a slight inconvenience all tour participants were pleased with the results.

A copy of this report has been sent to Blinn Junior College and another to the Texas Department of Health, Inspection and Compliance in Austin, Texas.

With warmest regards.

Sincerely,

HJ Deigl
