NRC FORM 318 (10/80) NRCM 0240

This refers to the inspection conducted under the Resident Inspection Program by Messrs. W. D. Johnson and L. J. Callan of this office covering the period of February 1-28, 1982, of activities authorized by NRC Facility Operating Licenses DPR-51 and NPF-6 for the Arkansas Nuclear One, Units 1 and 2, and to the discussion of the findings by the NRC inspectors with members of your staff at the conclusion of each segment of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors.

During this inspection, it was found that certain of your activities were not conducted in full compliance with NRC requirements. Consequently, you are required to respond to this matter, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

One of the violations identified during this inspection, involving a missing seismic support, was found during a follow-up inspection on a previous violation involving a seismic support. Your corrective steps taken to avoid further violations were apparently lacking in depth or thoroughness. In your response to the enclosed Notice of Violation, please include an analysis of the cause of this repetitive violation. Also include a summary of the methods which you intend to use to ensure that your corrective actions in response to violations will be thorough enough to detect and correct the root cause of the violations.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room unless you notify this office,
