

APRIL 5 1982

DMB 016

Dockets Nos. 50-321
and 50-366

Mr. J. T. Beckham, Jr.
Vice President - Nuclear Generation
Georgia Power Company
P. O. Box 4545
Atlanta, Georgia 30302

Dear Mr. Beckham:

Our generic letter of August 8, 1979 entitled, Adequacy of Station Electric Distribution Systems Voltages, described an event, at a nuclear power generating station, that caused concern about the conformance, at all nuclear plants, to our General Design Criterion 17, Electric Power Systems. By letters dated December 7, 1979, April 28 and October 9, 1980 and January 12, 1982, you responded to our letter of August 8, 1979.

We have completed our review of your analyses and design changes, as submitted in the above mentioned correspondence, and conclude, based on the enclosed Safety Evaluation, that the Hatch Plant Units 1 and 2, electric distribution system voltages comply with GOC 17 and therefore, we find the design to be acceptable.

Sincerely,

ORIGINAL SIGNED BY
JOHN F. STOLZ
