In a letter dated February 24, 1982, Commonwealth Edison Company (CECO) provided a draft revision to Section 8 of the Offsite Dose Calculation Manual (ODCM), Revision 3, dated November 1981, for the La Salle County Station. By letter dated March 10, 1982, CECO provided a commitment to revise Table 7.2-1 of the ODCM to limit the temporary outdoor storage tanks in Technical Specification 3.3.7.11 to 10 Curies, unless the Table 7.2-1 parameters for La Salle County Station are provided. Pending formal incorporation of the above commitments in Revision 3, we find the ODCM, Revision 3 to be acceptable.

In a letter dated March 10, 1982, CECO provided a revision to Section V of the Process Control Program (PCP), Revision 1 dated March 4, 1982 to be incorporated into the PCP. This change would assure that concentrator wastes would be mixed prior to sampling. We find the PCP, Revision 1 to be acceptable.

Sincerely,

Original signed by
Robert L. Tedesco
